

What's new in LogTag® Online v1.18.8

Shareable Shipment Links:

You can now easily share your shipment data with anyone, no LogTag® Online account required! With the new Shareable Shipment Links, users can create a temporary public link that provides real-time visibility into shipment location, temperature, alarms, and progress. This makes it effortless to keep partners, customers, or team members informed without requiring them to log in.

- Share shipments in any state (Pending, In Transit, or Completed).
- Recipients can view most recent shipment data (location, temperature, alarms, and progress).
- View and download a PDF report directly from the shared page.
- Links automatically expire after 3 days
- Manage shared links centrally in a new “Shared Links” view showing who shared, expiry date, and link status.
- Supports up to 30 shared links per team at once.
- Each shipment link can show up to five loggers within the same shipment, with the data updating in real time.

Revised Help and Support Page:

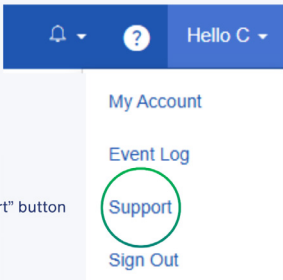

STEP 1:

Navigate to the top right of the LogTag® Online dashboard.

Click your profile dropdown in the top-right corner of LogTag® Online (next to 'Hello [Your Name]')

STEP 2:

Next, Select the "Support" button

STEP 3:

Now you have landed on the refreshed LogTag Online® Support page.

We've redesigned the Help and Support section in **LogTag® Online** to make finding answers faster and easier. The new structure offers clearer navigation and direct access to the most frequently used resources, ensuring users can quickly locate the information they need without searching through multiple menus.

The refreshed layout makes support simpler for both new and experienced users, helping you resolve questions independently and get back to monitoring your shipments with minimal downtime.

Faster access to support: The simplified design helps users quickly locate tutorials and guides as well as streamlined access to video guides and key setup guidance.

Improved clarity: The more intuitive structure enhances visibility of documentation and FAQs, making it easier to learn and troubleshoot effectively.
