

## EXTERNAL SENSOR EXTENSION CABLE

### External sensor extension cable *Suitable for light industry applications*

# STX-50

The STX-50 is a 5 meter (~16' 5") extension cable for extending ST10 or ST100 external temperature sensors. The socket end of the cable (which accepts the ST100 or

ST10 sensor plug) is fitted with a flexible sleeve that when the ST sensor's plug is in place will protect the mated connection to IP61.

- FDA Food Rated and Gold Plated Connector.
- Cable Terminated to MCX Plug.
- The STX-50 extension is designed as a permanent connection and not for frequent connections.
- Available in 5.0 Meter Cable Length (only 1 extension per logger).

|               |  |
|---------------|--|
| Product Model | STX-50   |
| Length        | 5 meters (16' 5" approx)   |
| Environmental | Logger to extension connection rating: IP61 (when logger vertically mounted or hung)<br>Extension to probe connection rating: IP61, -46°C ~ +74 °C |
| Compatibility | LogTag® ST100 and ST10 external temperature sensors  |

EMI might typically add an additional +/- 0.2°C measurement inaccuracy to the logger readings.
